Section 7—Jet Airplanes Leased Out By Airlines at Year-End 1985 Sorted By Name of Lessor 89-91

Introduction

Data in this edition of *World Jet Airplane Inventory* reflect, as accurately as possible, the status of the world's commercial jet airplane fleets (and some military derivatives) at the end of the year 1985

World Jet Airplane Inventory is composed of a selected number of computer printouts from JETTRACK, a computer-based jet-airplane-inventory system kept by the Market Research Department of Boeing Commercial Airplane Company. Fleet data in this system are obtained from many different sources, including airframe manufacturers, airplane owners and operators, governments, and trade publications.

This document provides details for announced orders, deliveries, and inventories for all commercial jet airplanes built in the United States and Western Europe with a capacity of 60-seats and up. In addition, the year-end 1985 inventory data in Sections 4 and 6 include non-Russian operators of the YAK 40 and larger jet equipment built in the U.S.S.R.

Announced jet airplane orders are summarized in Section 1. Orders that were placed and later cancelled are treated as if they never occurred.

The tabulations include all airplanes delivered to the market through December 31, 1985. This includes a small number of airplanes that were never sold by the manufacturer, but entered the commercial market on a lease basis. Not included are those manufacturer-owned airplanes that were never sold but are (or were) used exclusively for the manufacturer's private purposes, such as flight testing, route proving, etc.

Many older airplanes are parked or stored at many different locations around the world. The cost of restoring these airplanes to flight status often far exceeds their market value. A serious attempt has been made to exclude these run-outs from the counted inventories shown in this document.

The fleet inventory data in previous issues of this book have often been quoted as "airplanes in service." It should be emphasized that the counted inventory includes a number of airplanes that were not in service at the end of 1985. Obvious cases are airplanes in the inventories of brokers, leasing companies, and airplane manufacturers. This last category generally consists of trade-in airplanes. A number of airplanes in the airline inventories were parked pending re-sale, repairs, hushkitting, freighter conversion, etc. Details on airplanes temporarily parked by airlines are given in the footnote to Section 1, Table 8, on page 10.

Leased airplanes are included in the operators' fleets. Section 7 provides details on airplanes leased out by airlines.

Abbreviations

Operator names in this document are often abbreviated and therefore may vary from official names.

Some frequently used abbreviations of operator names include:

AL....Airline(s), Aerolineas, etc.
AT....Air Transport,
Aero Transportes, etc.
ATC ...Air Travel Club
AVN ...Aviation
AW.....Airways
GOVT...Government
INTL....International
TA.....Transportes Aereos, etc.

In Sections 1 and 5, three-letter abbreviations are used for airplane types. These abbreviations are mostly self-explanatory with the following exceptions:

CVR ...Convair 880 and 990
M80....MD-80 (DC-9-80)
D10....DC-10
L10 ....L-1011
727 ....727-100 series
72S ....727-200 series
737.....737-100/200/T43A
73S.....737-300

Airplanes built in Western Europe:

A30....A300
A31....A310
A32....A320
BAC...BAC One-Eleven
146.....BAe 146
CMT...Comet
CON...Concorde
CVL ...Caravelle
F10.....F100
MRC....Mercure
TRD.....Trident
V10.....VC10

Sections 4, 6, and 7 provide details by airplane type and series. Series ending with "F" are either freighters or are airplanes originally delivered as passenger airplanes that were later fitted with a large cargo door. Included in the latter category are the following:

BAC 1-11-400F
Convair 880-22F
DC-8-20F, -30F, -61F
707-320F
747-100F (also called 747-100 Special Freighter)

Airborne Express' DC-9-10LWF and DC-9-30LWF (Light Weight Freighter) are former passenger airplanes converted to freighters without a large cargo door.

Of the 138 listed 727-100Fs, 106 are former-100C or -100QCs, which already had the large door. The remaining 32 are converted -100 passenger airplanes.

Of the 27 listed 727-200Fs, 15 are original freighters, and the remaining twelve are former -200s.

A number of the DC-8-50Fs, DC-8-63Fs, DC-8-73Fs were originally delivered as DC-50s, -63s, or -63Cs.

707-320Cs configured as freighters are still listed as -320Cs (a -320F is a -320 converted to freighter).

Series ending with "C" are convertibles. Many of these are used as freighters while remaining convertible.

Series ending with "M" are Combis: 747-100M (converted 747-100 for Sabena), 747-200M (also called 747-200B SCD), and 747-300M.

KLM's fleet at year-end 1985 includes three 747-300s and five 747-300Ms which were former -200B/200Ms fitted with an extended upper deck. Two more of these conversions have been done for KLM during the first quarter of 1986.

Note:
1) Deliveries exclude airplanes which were built, but which never entered the market. They are - or were- used by manufacturers for testing purposes, etc.
2) W/O = Written-off: accidents, fire, sabotage, acts of war or terrorism.
3) Retired: broken up or to be broken up in near future, cannibalized for parts, used for ground training or fire practice, used for structural testing, stored or abandoned in derelict condition, and run out of time.
4) Preserved: on display, or intended for future display.
5) Stored: airplanes which have been stored intact for longer periods, but which could possibly be restored to flight status. (includes one hijacked A310).
